The **Max Air Purifier** is a Dual Core Wall Mounted Air Purifier that delivers premium salon air purification specifically designed for nail, hair, and lash salons up to 750 square feet, effectively eliminating 99.99% of harmful salon-specific contaminants. Equipped with advanced monitoring technology and state of the art photocatalyst filter technology, this purifier displays real-time air quality with color-coded indicators, automatically adjusting to maintain optimal air conditions.

The **Max Air Purifier** is a portable Room Air Purifier that is Great for Salon Suites:

- Dual Core Air Purifier quickly removes VOCs, odors, dust, fine particles, pollen, and harmful contaminants with its innovative double air inlet and outlet design.
- High-power UVC LED technology deactivates bacteria and viruses with up to 12 powerful LEDs covering all areas of air inlet.
- Smart sensors detect air quality in real-time, automatically adjusting fan speed for optimal purification based on current conditions.
- Purification rate up to 99.99% efficiency with 224 cubic feet per minute (cfm) clean air delivery rate for rapid air cleaning.
- Sleek wall-mounted design with easy installation saves valuable floor space while providing maximum coverage.
- Can be used in homes, offices, healthcare settings, classrooms, or any indoor environment requiring cleaner air

SPECIFICATIONS

▶ **EXTREMELY QUIET /**

Designed specifically for nail salons or salon suites, where tranquility is key.

▶ **SMALL FOOTPRINT /**

Can be hung on the wall, or has feet to stand on a table or the floor

▶ **AREA OF POWER**

Serves rooms up to 750 square feet. If your room is bigger than this, two or more at each end of the room are suitable.

▶ **ADVANCED FILTRATION/**

Advanced formaldehyde removal system with three-layer filtration: white nylon mesh, specialized filter paper, and photocatalyst cotton for comprehensive chemical purification. HEPA filtration technology effectively captures particles for cleaner air

▶ **FILTER REPLACEMENT/**

Filter can be changed every 6-12 months

▶ **EASY TO USE /**

Automatically detects odors and fumes and increases speed to purify the air!

▶ **WIFI CAPABILITIES/**

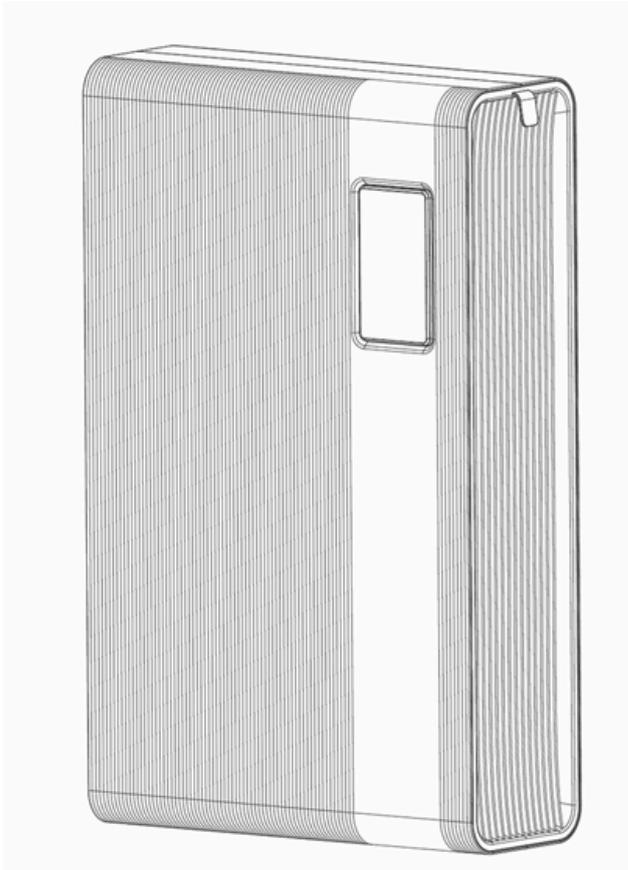

Download Tuya App to monitor air quality in real time!

▶ **COLOR /**

Available in white

50-60HZ

VERY LOW NOISE

less than 58 decibels

The **Max Wall Mounted Air Purifier** provides whole-room air purification while keeping floor and workstation space clear. Dual-core filtration captures fine dust and airborne particles down to 0.3 microns.

Features include Auto Air Quality Detection, six fan speeds, UV-C + Ion, filter life indicator, and WiFi + remote control for easy operation.

Covers rooms up to ~750 sq ft. Mount to the wall or set on a counter as needed.

Key Features Summary

- Wall-mounted or desktop installation
- Dual-core high-efficiency filtration (fine particles down to 0.3 microns)
- Auto Mode adjusts fan speed based on air quality
- Real-time PM2.5 air quality display
- WiFi app control + Remote included
- UV-C sterilization + Ion generator
- Six fan speed settings + quiet sleep mode
- Filter replacement indicator
- Ideal for salons, lash studios, nail rooms, treatment rooms, and home offices

MAINTENANCE

Thank you for choosing the **Max Wall Mounted Air Purifier**. This unit is designed for use in nail salons, lash studios, hair salons, spas, and residential environments. The dual-stage filtration system helps reduce airborne particles, including fine dust, pollen, and common salon-related airborne contaminants. The unit also features UV-C and ionization technology to support a cleaner, healthier air environment. It is well-suited for individuals with sensitivities such as asthma, allergies, or hay fever.

	Speed display You can set 1-6 Speeds.
	Air quality indicator light Green: The air quality is good Orange : The air quality is normal Red: The air quality is poor
	PM2.5 datas & timer
	Function display icon The icon corresponding to the enabled function lights up.
	Touch button The icon corresponding to the enabled function lights up.

Max Air Purifier control panel

- **To turn on:** After connecting with the power, touch the "on/off" button to start the unit. A second touch will turn off the unit.
- **Mode:** Touch the MODE button to select automatic mode or sleep mode operation.
- **Automatic Mode:** The machine will automatically adjust the speed operation according to air quality.
- **Sleep Mode:** The machine runs at low speed and all lights except the sleep indicator light are turned off.
- **Speed:** Touch the SPEED button to select running speeds 1-6.
- **UV:** Touch the UV button to turn on or off the UV function.
- **Ion:** Touch the ION button to turn on or off the negative ion function.
- **Filter Element Reset:** When the machine has been run for a certain period of time, the air quality display light will flash in red. At this time, a new filter element should be replaced. Press and hold the MODE and SPEED buttons for 3 seconds at the same time. The buzzer will make a "beep" sound. The red light flashing will be cancelled, and the filter life will be reset.

MAINTENANCE

Timer: Click the clock button, B.B.B displays 1H, 2H ... 12H, the time flashes at an interval of 0.5S, flashes five times to indicate the determined time, and then stops flashing (click again, the timing time increases in sequence, The timer is canceled after 12 hours), and the machine automatically shuts down after the corresponding time.

Product QR code

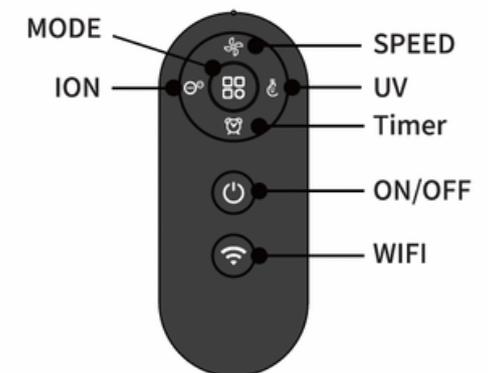

WIFI Connection:

- 1) Install Tuya APP
- 2) Scan the QR code of the product, or search for "Tuya Smart" in the app store, download and install the Tuya Smart APP, and users who have installed the Tuya Smart APP will be directed to the device connection page.
- 3) Register your account - Click "Register", and the privacy policy page of Tuya Smart Platform will pop up. After reading and agreeing, you will enter the account registration page.
- 4) You can register with your email or mobile phone number. The country/region will follow the settings of the mobile phone system. You can also manually change the country /region (the country /region can not be changed after the registration is completed). After entering your information, click "Get Verification Code".
- 5) After entering the received verification code, it will jump to the setting password page. After setting the password according to the prompt below, click "Finish" to complete the registration.

Add device

- 1) Press and hold the WiFi button for 3-5 seconds on the display of the air purifier. When you hear a "B" sound, the WiFi is turned on, and the WiFi indicator is flashing, waiting for the WiFi to be configured.
- 2) On the device list page, click the "Add Device" button in the center or click the "+" button in the upper right to enter the "Add Device" page. Currently, there are two methods: "Manual Add" and "Auto Discovery". ("Auto Discovery" mode requires permission to allow the app to use "Wi-Fi and Bluetooth")
- 3) Select the item "Small Home Appliances" - "Surroundings" - "Air Purifier (WiFi)" function
- 4) You will first enter the "Enter Wi-Fi Password" page (only supports Wi-Fi networks in the 2.4G frequency band, make sure the phone is connected to WiFi) If you already know how to configure the network, you can select the corresponding configuration according to the status of the indicator light. net way. If you are not clear about the process of network distribution, you can click the option "Light is not flashing" to check.
- 5) When the addition is successful, click on the APP home page to operate the air purifier function on the APP.

Remote Control

NOTE: Before Use: Please remove package, protection film on the product and plastic bag of the filter before turning on.

Problem: Unit won't turn on – How do I reset it?

Check whether the power plug is plugged in correctly and the grille is installed properly.

Problem: Air Volume/Air Purification effect is low:

Check whether the plastic bags on the air purifier filters have been removed.

Problem: Air quality indicator light flashes RED

Replace your filter and reset the unit by pressing the MODE and SPEED button for 3-5 seconds simultaneously.

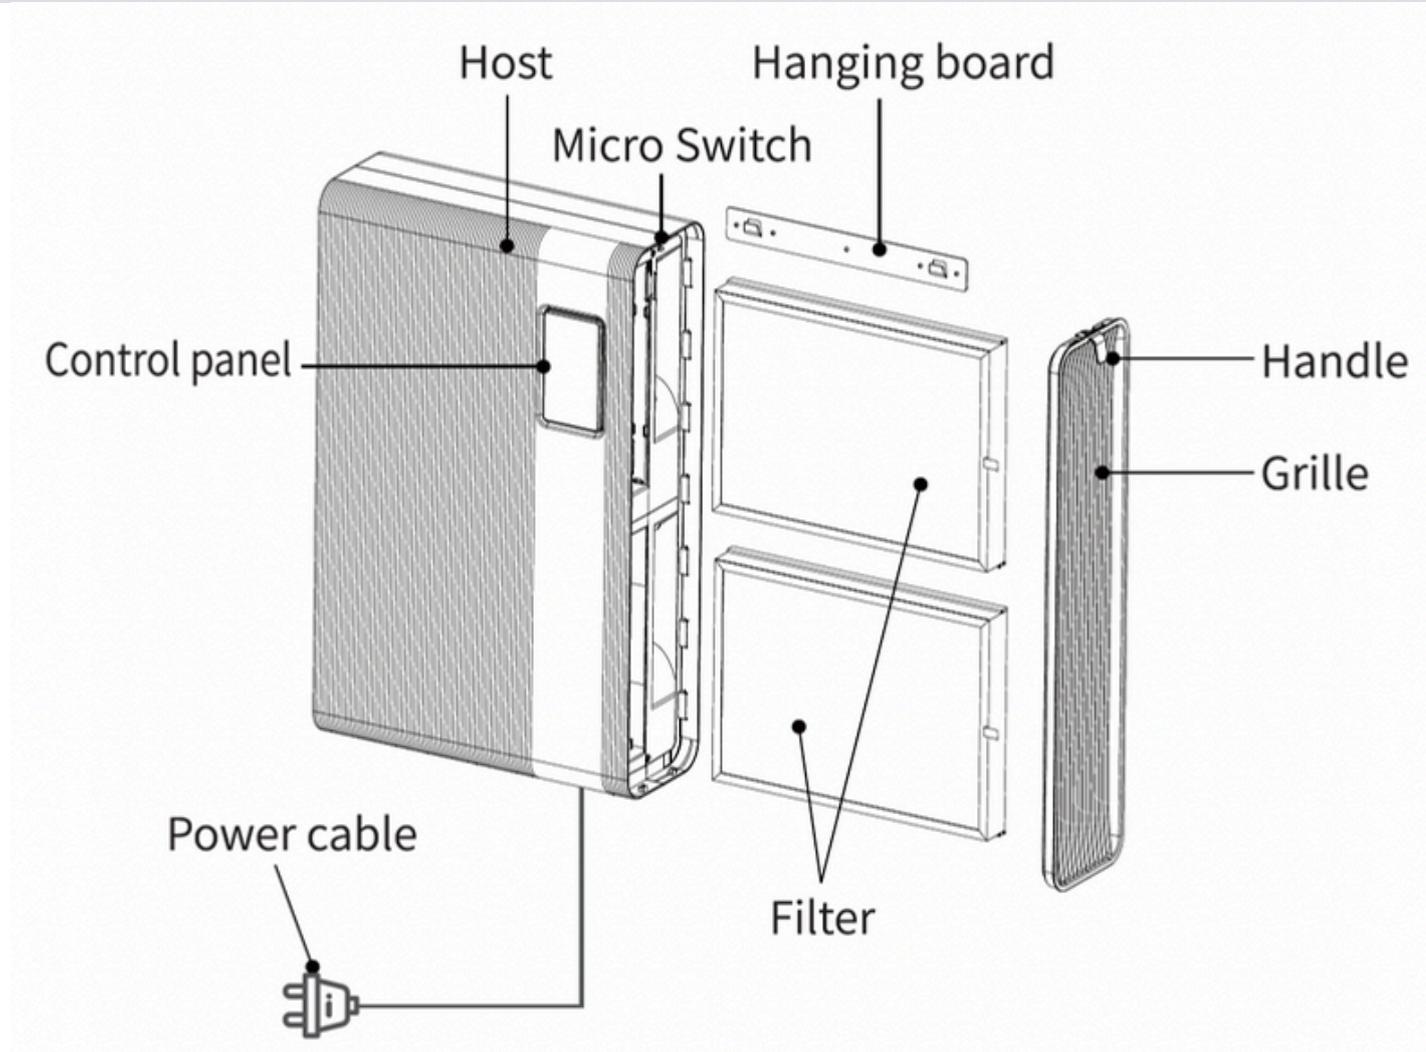

My air purifier is making a noise

When running “ION” mode, the air purifier will make a slight noise when releasing ions. This is a normal sound when the product is running.

PRODUCT BREAKDOWN
